

# Submitting 8 week weights online

## Web based data entry for Signet Sheepbreeder Members

Version 3. 01/07/2016

Updated at <http://www.signetfbc.co.uk/sheepbreeder/technical-information-sheep/>

### Instructions for users

Signet clients are now able to submit 8 week weights online. This short note explains how to clients can enter their weights.

For further information contact me directly

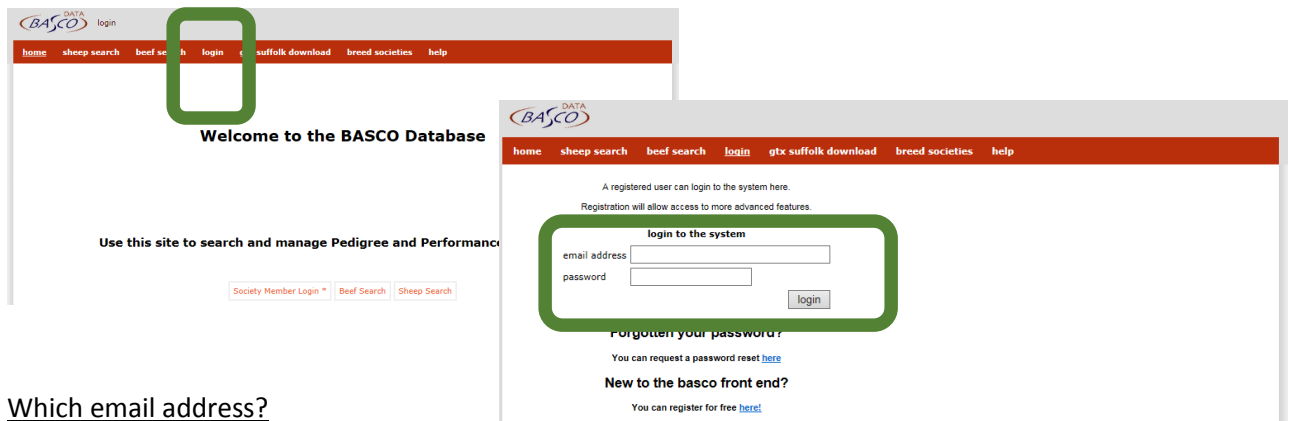

Stephen West Tel: 0247 647 8879 Email: [stephen.west@ahdb.org.uk](mailto:stephen.west@ahdb.org.uk)

### Getting started....

To access the website go to <http://www.basco.org/> and click on “login”

**Remember** the email address used must be that one currently linked to the flock

The image contains two screenshots of the BASCO website. The first screenshot shows the website's navigation menu with the 'login' link highlighted by a green box. The second screenshot shows the login page with the 'login to the system' form highlighted by a green box. The form includes fields for 'email address' and 'password', and a 'login' button. Below the form, there are links for 'forgot your password' and 'new to the basco front end?'. The website header includes the BASCO logo and navigation links: home, sheep search, beef search, login, gtx suffolk download, breed societies, help.

#### Which email address?

To check this users can go to sheep search / breeder search – and using the drop down menu to select “breed” pull back information about their flock – including their email address.

New users can register via this page. Established users can use the page to re-set their password. When the user logs on successfully they are taken to “My Page” which will list all of the active flocks in the breeder’s ownership.

Clicking on your flock details provides breeders with access to a number of functions including “birth notify”, “embryo transfer”, “census” and “performance recording” screens. The section you require is “census”

## Performance screen

At the moment the performance screen simply allows 8 week weights to be uploaded. Weigh dates can be entered individually – or auto populated using “Autofill Weigh Date”.

All weights must be entered in kilogrammes. Management group can be used to distinguish between lambs reared in different ways, such as a show team and a commercially run group.
